

... "it works, it's fast, data-entry is a snap, and it's fully integrated. Support is excellent, and improvements continue on an ongoing basis. Why would I switch?" ...

Designed for the:  
grower  
retailer  
nurseryman  
landscaper  
contractor  
wholesaler  
garden centre

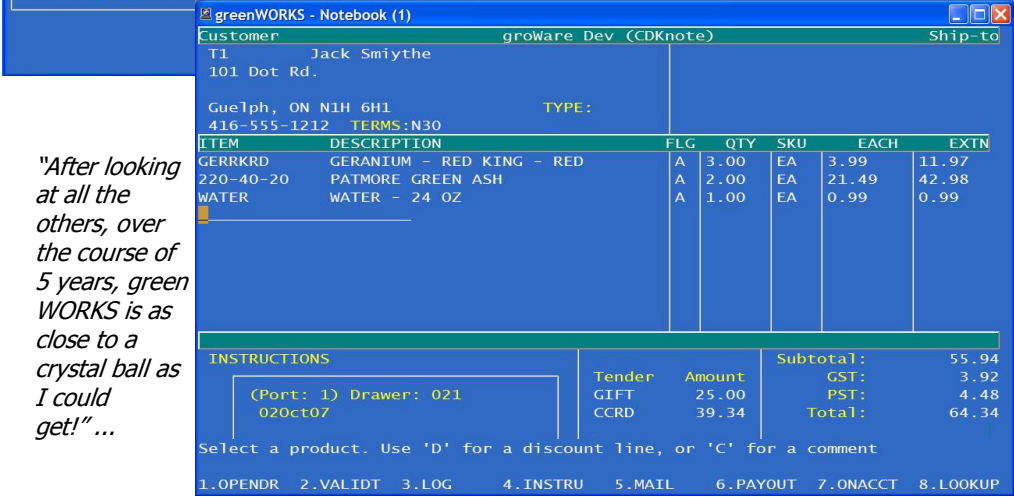

- by -

Quality Computing Works

Working with:  
perennials  
annuals  
trees  
shrubs  
containers  
bare-root  
hard-goods  
groceries  
bedding plants  
flowers  
vines  
fruit trees

"After looking at all the others, over the course of 5 years, greenWORKS is as close to a crystal ball as I could get!" ...

**System Requirements**

The server may be any computer running Windows 2000, 2003, XP, or Vista (over 10 users requires Windows Server). Typically 450mb of disk space is required, more recommended. A minimum of 512mb RAM, Pentium 4, CD-ROM drive and modem are required. Dual-core processor w/1gb RAM ideal. Using a true 32-bit database we suggest that ALL applications on your server also be 32 bit. Integration with Microsoft Word & Excel included. The D3 database is ODBC compliant and may be accessed externally by Microsoft Access and other ODBC client products. Support for Unix available. Graphic workstations may be any PC capable of running TCP/IP and Internet Explorer. Text terminals, including those by Wyse, DEC, and IBM, are supported, but not recommended. Any Windows supported, network-capable, printer will work (raster print drivers not recommended but useable).

IN DETAIL Command: Up/Down Arrow,P=POmaint,S=SOmaint,X=LeaveDetail

### For the Grower

- Product reservations, by location if desired, at order entry time
- Multiple inventories, by season, integrated w/typical polyhouse, tag-color, etc.
- Full bar-code support, w/full integration with Labelview Gold and Nice Label. Print labels for full or part orders, and print customer prepricing and logos if desired.
- Wholesale availability (see right) printed, faxed or posted to the Web
- Complete product descriptions in up to 3 languages (common and botanical name typically used as the first 2). Flexible product coding.
- Product substitutions at order, acknowledgement or ship time, visible to the customer or not.
- Multiple discount structures including seasonal volume rebates, divisional differences, quantity breaks, and selling at one price while taking orders at next spring's price. Re-price booking orders at any time.
- Production module allowing bench-space, material and labor planning, with complete support for structures, purchasing and sales links.
- Most reports allow selection by genus, variety, size, code, etc.

### For the Retailer

- Full security POS integrated completely with all other modules including inventory.
- Product re-order reporting with over and under stocks high-lighted.
- Sale pricing (entered in advance of start date) and automatic deactivation afterwards. After-the-fact reporting with sale price results
- Any slip printer, scanner, and pole-display useable.
- "At the till" paid-outs, customer payments and automatic planting and shipping fees, delivery forms, multi-level pricing.

greenWORKS ... is of interest to growers, wholesalers and retailers in the green-goods industry. Originally designed specifically for companies working with trees and shrubs, 20 years of enhancements have produced custom features making it ideal for the retailer and landscape contractor, as well as those in the bedding-plant and perennial industry. Licensed by the number of users, greenWORKS can be integrated with your business no matter how large or small.

### For All Users

- Virtually all information can be exported or manipulated directly from outside greenWORKS using Microsoft Word, Excel and Access.
- The D3 database being ODBC compliant, allows custom reporting using outside links such as Crystal Reports, email PDF invoices, etc.
- All features can be tailored to your requirements. It's a custom package.
- Internet ready, using TCP-IP for all connections to the server, remote access by the sales force and staff is built-in. Even customer access to specific data is possible. No limits on number of printers.
- Full integration of all modules, lookups by customer/supplier name, code, phone#, products by name, UPC, code, vendor part#, etc.
- Full integration of hand-held computers w/scanners, remote scanners, and RFID allow a drastic reduction in after-the-fact data-entry
- Full multi-user with user-configurable security. No limits on user count.
- Provides generally faster, more accurate customer service; with reduced admin costs. More accurate and timely reporting, with superior planning and inventory control.
- All forms can be customized, and printed to any printer.

### For the Accountant

- External integration possible to Quick Books or Simply Accounting

- Complete multi-currency, multi-division, multi-tax and multi-company (optionally interlinked) support on one server.
- Full open-item accounting configurable aging and applications, full GL reporting with financial statements. GL report writer is totally flexible

### For the Landscape Contractor

- Full featured quoting system with the ability to track quote revisions and actual to quoted price
- Full reference to drawing keys, and integration to inventory, sales and accounts receivable.
